

Ashby Cross Company

OPTIONS

Heated tanks with proportional control

50 RPM, electric motor driven agitators with dynamic seals allow vacuum to 2 Torr, assure uniform heat distribution, degass, and solids suspension

Vacuum pump, gauges, plumbing, regulators, and pressure vacuum valve provide a complete vacuum degass system

Sight tubes for visual level detection

Volumetric (measured) shot size controlled by encoder assures accurate, repeatable dispensing. Minimum shot size achievable is machine dependent

Ultrasonic level sensors are highly reliable, unaffected by materials and provide alarm to prevent running dry

Pot life timer prevents material from curing in the mixer

Options

Hand-held dispense gun brings the adhesive to the work - allows greater flexibility

Portable cart adds flexibility in production layout - simplifies maintenance - consolidates all components onto one platform

Remote Tank Fill

Feed Systems

55-Gallon transfer pump

55-Gallon transfer pump with agitator and pneumatic lift

Agitated pressure tank with transfer pump

5-Gallon ram inducted pump used with paste and high viscosity materials

55-Gallon ram inducted pump used with paste and high viscosity materials
